MDO PAINT GRADE TWO SIDE OVERLAY PANEL

Panel overlaid with faces MDO with 235 g/m² both faces.

GENERAL SPECIFICATIONS

Excellent use for marking highway signs easy to install and weather resistant.

Both faces are overlaid with MDO of 235 g/m².

Its smooth surface is obtained for a process of "two step", first a good sanding of the plywood and then the overlay is applied.

High strength, light weight.

27% phenolic resin in MDO.

PRODUCTS, FEATURES AND APPLICATIONS

Avoid extreme temperatures and moisture.

Always clean and dry the surface before painting.

The paint priming coat is the most important hence, do not apply too thin of a priming coat. Oil/alkyd primers are recommended; latex primers also work well.

No other surface preparation is needed.

It is also recommended to seal the edge for an adequate protection against moisture penetration.
