

# MDO PAINT GRADE ONE SIDE OVERLAY PANEL

Panel overlaid on main face with MDO overlay with 235 g/m<sup>2</sup> only one face.

## GENERAL SPECIFICATIONS

Excellent use for marking highway signs easy to install and weather resistant.

Its main face is overlaid with MDO 235 g/m<sup>2</sup> and back face without paper.

Its smooth surface is obtained for a process of “two step” process, first a good sanding of the plywood and followed by applying the overlay.

High strength, light weight.

27% phenolic resin in MDO.

## PRODUCTS, FEATURES AND APPLICATIONS

Avoid extreme temperatures and moisture.

Always clean and dry the surface before painting.

No other surface preparation is needed.

The paint priming coat is the most important hence, do not apply too thin of a priming coat. Oil/alkyd primers are recommended; latex primers also work well.

It is also recommended to seal the edge for an adequate protection against moisture penetration.
